Registrations are the responsibility of the breeder. Unless animals are sold earlier, we do not register cattle until they are two years of age, when we can assess their worth with greater accuracy.

Pedigrees etc. are recorded through BREEDPLAN where there is provision for performance recording.

The weighing is on a voluntary basis but is essential if you wish to do accurate comparisons between animals. There is no need to weigh calves to create EBV's.

Computer generated sheets will be sent to you for the following records for any one year for animals disposed of (Animal Disposal List – ADL). Calves born (Calf Entry) sheet is generated from the information on the returned ADL. Animals registered (as 2yo) and computer reports are then returned to the breeders for calving, weights and bull fertility.

Please contact the office if you have any queries.

FURTHER INFORMATION WILL BE SENT IN INFORMATION PACK ONCE APPLICATION FOR MEMBERSHIP IS RECEIVED.
